

How to add \$EVE to your wallet

This document provides a step-by-step guide for adding the Polygon network to your wallet and importing \$EVE token.

On MetaMask (Browser Extension) METAMASK

First: Add the Polygon network polygon

1. In the top right corner, click where you see "Ethereum Mainnet".
2. A drop down will open, click "Add Network".
3. Use the below information to fill out the fields.

Network Name: Polygon Mainnet
RPC URL: <https://polygon-rpc.com/>
Chain ID: 137
Currency Symbol: MATIC
Block Explorer: <https://polygonscan.com>

4. Click "Save" and you're done with adding the Polygon network.

Second: Add \$EVE token

Now you have added the Polygon network, make sure it is selected at the top right and follow these steps:

1. Scroll to the bottom of the MetaMask pop out, click "import tokens".
2. Select the "Custom Token" tab, and use the below info to fill out the fields.

Token Contract Address: 0xaE29AC47A9E3b0a52840E547aDf74B912999F7fc
Token Symbol: EVE
Token Decimal: 18

3. Click "Add Custom Token" and you're done with adding \$EVE.

If you have \$EVE tokens you should be able to see them now, you can also view your wallet and it's content on: www.polygonscan.com
